

The philosophy and care at Primary Care Associates of Appleton aligns with my personal beliefs in putting the patient first and providing personalized care. Joining the Internal Medicine team lends itself well with my interests in preventative care and chronic disease management, along with my strong background in cardiothoracic care.

The most rewarding part of my job is developing long-term relationships with patients and getting to know them as a person. I strive to support patients in many different ways: physically, mentally, emotionally, and spiritually. My goal is to ensure my patients have a full understanding of their health, working with them to create a plan as a team, as well as providing the tools and support necessary to make informed choices regarding their health.

Education

Degree:

Wake Forest School of Medicine - Winston-Salem, NC

Certification:

National Commission on Certification of Physician Assistants

Professional Interests

Women's health, cardiology, preventative care, and chronic disease management.

Personal

Outside of work I enjoy traveling, running, reading, playing the piano, and cheering on the Wisconsin Badgers.

Jennifer Wenninger, PA-C
