

Ashley Feistel, APNP

I love meeting new people, and as a primary care provider, I get to do this nearly every day. I look forward to creating long-term relationships with patients, and assist them in achieving their preventative medicine goals.

I want to know my patients beyond their diagnosis, and will provide compassionate and patient-centric care, treating each patient as if they were my own family. With my relaxed and comforting approach, I strive to build trusting relationships and hope patients leave each visit feeling their needs are being met. Helping people achieve their goals and witnessing them becoming advocates in their own health is truly the most rewarding part of my job.

Education

Degree:

Bachelors of Science in Nursing:

Carrol University - Waukesha, WI

Masters of Science in Nursing:

Marian University - Fond du Lac, WI

Board Certification:

American Academy of Nurse Practitioners

Professional Interests

Geriatrics, oncology and preventative health

Personal

My hobbies and interests outside of work include anything that involves my family, and I particularly enjoy spending our weekends at our family cottage in Bailey's Harbor, Door County.
